

CapitalCare Pediatrics-Clifton Park proudly offers our families the state sponsored program known as Vaccines for Children.

- Families that have NO INSURANCE
- Families that have insurance, however does not cover immunizations in full
- Families that participate in any Medicaid or Child Health Plus programs
- Families that are American Indian or Alaskan Native

If you are not sure if you qualify for this program, please speak to our receptionist. There is a small out of pocket expense for these vaccines, known as an administration charge (this covers the cost of the syringe and nurse) It's important to note that Medicaid and Child Health Plus programs cover this charge in full.

For more information about the Vaccine for Children Program, please visit the CDC website at :
